SECURITY SOLUTIONS

- SMART CITY SURVEILLANCE.
- TRAFFIC MANAGEMENT.
- TRANSPORT & LOGISTICS MANAGEMENT.
- INFRASTRUCTURE SECURITY MANAGEMENT.
- MULTIPLE SYSTEM INTEGRATION.

CONNECTING YOUR BUSINESS TO THE SECURITY RESOURCES YOU NEED

Technology at work for you

SMART CITY SURVEILLANCE

Insuring safety and security to civilians by law enforcement agencies in urban areas is both fundamental and critical. To enable this, we provide state of art intelligent solutions that include but not limited to applications such as video management system, video and audio analytics, Geographical Information Systems (GIS) and Computational Intelligence based on computer vision and machine learning algorithms to enable decision making and automation.

Smart City Surveillance includes:

- Surveillance equipment
- Command / Monitoring center
- Strategic location survey for CCTV installation
- Application portfolio
- Data centers
- Emergency call box
- Border / Perimeter surveillance
- Inter-City and Inter-Department system integration

TRANSPORT & LOGISTICS MANAGEMENT

Considering the initial costs of establishing the fleet, routine maintenance, parts replacement, and all the other aspects, managing and maintaining a fleet of vehicles for your business may seem like a lot of hassle. However, a small investment in your fleet limits your revenue drainage, ensures that your drivers are safe, provide vehicle telematics (tracking and diagnostics), and that deliveries and services are provided in a more effective and efficient manner.

Transport & Logistics Solutions include:

- Vehicle tracking
- Driver management
- Speed management
- Fuel management
- Tire management
- Surveillance / Monitoring
- People counting and e-ticketing
- Panic system
- Two-way communication on panic alarm
- Route Geo-fencing and alert

TRAFFIC MANAGEMENT SYSTEM

Intelligent traffic management system allows better monitoring from a centralised base / command center that will help reduce traffic congestions, improve incident response time, and optimise traffic flow proactively. Our analytics can also help in predicting traffic patterns based on historical data obtained from multi-faceted traffic management sources and Internet of Things (IoT) devices.

Traffic Solutions include:

- Surveillance equipment
- Command / Monitoring center
- Automatic Number Plate Recognition System (ANPR)
- Automatic Fare Collection System
- Automatic RFID based Toll Booth System
- Centralised data analytics and reports
- Inter-City and Inter-Department system integration

INFRASTRUCTURE SECURITY MANAGEMENT

Infrastructures such as corporate offices, warehouses, smart buildings and critical infrastructures such as power plants and airports require multi-layered security solutions that are reliable and have fail safe systems. We offer customised solution based on survey carried out by field experts.

Infrastructure Security Solutions include:

- Surveillance equipment
- Command / Monitoring center
- Video analytics
- Access control system
- Intrusion detection
- Perimeter fencing and protection
- Gate control
- Automobile access control
- Temperature and Humidity monitoring
- Panic system
- Fire alarm system

**flexible solutions for
your business needs**
